

Physical Evidence in Burglary Investigations

For the Crime Scene Investigator

Skokie (IL) Police Department

Wednesday September 16, 2020

The most prolific serial criminal that any community will face is the burglary offender. Driven by drugs, gambling debts or just day-to-day survival, a single individual will victimize a community until caught. The successful prosecution of just one offender can have dramatic results on a crime rate.

This one-day (8 hour) interactive training session is designed for any investigator assigned to burglary investigations either as a crime scene technician processing a scene or as the primary follow-up investigator. This interactive session includes both lecture and hands-on demonstrations.

This program focuses on residential and commercial burglary investigations.

Upon receipt of the registration form, a confirmation notice will be sent including directions to the class site.

For more information go to imprimus.net/Burg or call us at 847-804-8420.
