

## Scene Sketching & Diagramming For the Incident Scene Investigator

**Oak Creek Police Department (WI)**

May 20-22, 2019

This is a three day (24 hour) hands-on workshop designed for the incident scene investigator responsible for documenting criminal as well as non-criminal incidents.

This program is designed to teach students how to supplement scene photography and reports with appropriate diagrams. Those attending will be required to bring photography equipment.

The registration fee includes all materials used in the class including film and film processing.

The small class size of this workshop is meant to allow students ample time to work through practical exercises and to permit the instructors to closely evaluate each student's work.

Upon receipt of the registration form, a confirmation notice will be sent including directions to the class site and a list of equipment that the student will need to bring.

Please contact Mike Wasowicz at Imprimus Forensic Services, LLC with questions or requests for additional information (847-804-8420).

Students benefit from this workshop with

- More accurate documentation of evidence
- Easier to understand reporting
- More effective courtroom presentation

Topics covered include:

- Indoor & Outdoor Scenes
- Completing Field or Rough Sketches
- Completing Finished Diagrams
- Completing Scale Diagrams
- Measuring Devices - Mechanical & Electronic
- Basic Drafting Skills
- Standard Symbols and Layout Techniques
- Diagrams as Demonstrative Evidence
- Courtroom Presentation
- Introduction to Software Based Drawing Programs
