

Incident Scene Videography for Investigators

Naperville (IL) Police Department

June 3-4, 2019

This is a two day (16 hour) hands-on workshop designed to enhance the documentation skills of the incident scene investigator. It will provide the investigator with a solid understanding of the role played by the proper application of video in various types of investigations.

It will also teach professional video techniques that will assure high quality video results. This workshop utilizes hands-on shooting exercises and is well suited for all personnel who will use video to document static incident scenes, like crime scenes, fire scenes and suspect interviews, or dynamic incident scenes such as public demonstrations.

The small class size of this workshop is meant to allow students ample time to work through practical exercises and to permit the instructors to closely evaluate each student's work.

Upon receipt of the registration form, a confirmation notice will be sent including directions to the class site and a list of equipment that the student will need to bring.

Areas of instruction include:

- Camera Operation Fundamentals
- Technical Requirements for Scene Videos
- Professional Video Techniques
- Supplemental Lighting & Audio Equipment
- Surveillance Techniques
- Suspect Interviews
- Courtroom Presentation
- Equipment Selection & Accessories
- Video Copy & Duplication
- Video Preservation
- Equipment Maintenance
